

Welcome to all my valued patients!

I'm proud to introduce our brand new patient newsletter, designed to keep you informed on all the new developments in dentistry, to provide valuable information on dental health, and to keep you informed of the many services we offer that are or will be available to you.

You will receive an email from our office about 3 or 4 times a year. The email will provide an overview of the newsletter content, along with a link to the full article. You will be able to quickly determine if the topic is of interest to you. Many may be of interest to all of you, but others will be more specific in nature.

The newsletter will be in an easy-to-read format, and I think you'll find the information very helpful.

Along with my practice, I am on the teaching faculty of the Center for Aesthetic Restorative Dentistry (CARD), one of the premier post-doctoral programs in the nation, and a board member of the Dallas Study Club (DSC). DSC is an international organization of dentists, whose Dallas chapter has approximately 60 of the top dental general practitioners and specialists in the country. My association with these groups allow me to have access to the finest dentists and researchers, and also the newest advances in dentistry.

Along with our practice of general dentistry, we also treat people from across the country seeking advanced care and treatment that many offices are not able to provide. Patients come to us with many unique and specific needs, and as research and experience reveals new and better treatments, we are prepared to provide the highest quality treatment.

Along with this specialty however, there are many topics that can be of benefit to all . . . thus the evolution of this newsletter.

For example, I will recommend new products, as they become available. You can always be assured that I have personally used and am well familiar with the recommended products. Additionally, I will provide links featuring further information and where the product(s) can be purchased locally.

This is an exciting time in dentistry and an exciting time to be a dentist. There

are many remarkable advancements that allow me to perform the quality of dentistry I have always wished to provide.

Many times, when I have the opportunity tell you about these possibilities, your response is that you didn't know it could be done, and therefore you didn't even know what to ask for. I hear this almost every week. This is why our newsletter will be of such great value. I can promise you that the information we send will not be merely words on a page to take time from your busy schedule. Our sole purpose is to keep our patients informed and educated on the quality care, services and products available and keep the lines of communication open.

In addition to our newsletter, we are also introducing our Facebook page and our soon to be Twitter and Linked in pages. We will be providing our newsletter and our product updates on our pages

Remember, you can always email me with any questions at ron@drbosher.com.

Our topic for our next newsletter: **What's the Deal About Xylitol**

Best regards,

Dr. Ron Bosher

PS: Everyone knows how I like to find good local restaurants, especially those that are family owned. So periodically I will include some of my favorite places and if you have one to share, please email me. Of course I will have to check it out first. Now that's dedication!
