TEXAS SUPER DENTISTS 2009

Key Professional Media asked more than 9,000 dentists to nominate one or more dentists, other than themselves, from particular specialties based on one question: "If you needed care, who would you choose?"

After totaling the responses, our research team also identified those dentists who have achieved special recognition from their peers or have demonstrated other indications of expertise. In the end, this list includes dentists in eight specialties. To find a dentist who is highly recommended by his or her peers, begin your search here.
